DETAILED ACTION

Allowable Subject Matter

Claims 1-18 are allowed. The following is an examiner's statement of reasons for allowance: the prior art made of record teaches a method for measuring receiver mixer I/Q mismatch in a transceiver comprising providing a training signal for a receiver mixer, the training signal having periodic correlated signal and determining a phase and gain mismatch in the receiver mixer over a unit period but does not teach a training signal *having periodic uncorrelated I and Q signals*. Also, reference the applicant's remarks filed 03 August 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon but considered pertinent to applicant's disclosure includes Masenten (US 6,842,489) that teaches a receiver adaptively calibrated for I and Q imbalance by using a coherent reference signal.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blane J. Jackson whose telephone number is (571) 272-
